

SCIENTIFIC - CLINICAL SEMINAR

Know that the patient has nerve interference.

Confirm that the patient has nerve interference.

Know how to interpret the graph of bi-lateral full spine skin temperature differentials.

Know when no interference exists!

Know when an increased nerve supply is getting through.

Know when the patient's body says "help" or leave it along; Innate is doing the work.

Know what is average - below average.

Know how to plot progress of patient with the graph, so that he, too, can see it!

Do you have interference? We can verify! It can be corrected! Bring a problem case. (Cervical X-rays & adjustment \$ 75.00)

Know where atlas is in relation to the objective of where it belongs. Know how to determine this easily and dependably - DUFF METHOD Precision in Chiropractic Care.

View hundreds of Foramen Magnams - Study fetal (all stages), newborn, infant, juvenile, adult. Condyles of all shapes and articular surfaces -- for instance, Anterior divergence of condyles! Duff Method will accurately determine where the center of the Foramen Magnum is! (Dry specimens and X-rays) Thirty-two years of never finding constant interference below atlas-axis area as spinal cause! Full spine films and graphs say "don't waste your time and the patient's on lower effects due to upper spinal cause!"

"I would never hesitate in referring a patient to Doctor Duff." B. J. Palmer, 1953. "Dear Doctor Duff, you can little imagine how proud and pleased we are of the work you are doing." B. J. Palmer, 1956.

The D. D. Palmer Scientific Award for Research and Chiropractic Standards offered in 1968 (accepted in 1972 at the graduation of Stephen A. Duff Jr.)

Let's Set the Record Straight

B. J. Palmer sent fifty letters to the leadership in the profession regarding the so-called green light or "adjusting" beneath the atlas-axial area. I was sent one of the letters. Dr. Palmer said, "If after checking the patient by instrumentation full spine daily for two weeks and there was no change to the better in the graph at a lower level, then and then only would an adjustment of the misalignment (not a subluxation) be justified!

He knew as I know that interference would not persist if the top was clear. Dr. Palmer knew -- I know -- do you?

Duff Chiropractic Clinic - Largest in California.

You will be x-rayed, graphed and adjusted by me, plus Friday, Saturday and Sunday of more chiropractic than you ever had in any seminar. How to will be taught! Advanced information on a practical level is here and available.

You pay \$ 350.00 only (+ \$ 50.00 if x-rayed & adjusted) includes instruments.
Students \$ 100.00 (+ \$ 35.00 if x-rayed & adjusted) includes instruments.
Doctor's refresher \$ 100.00. Student refresher \$ 60.00. Saturday only \$ 50.00.

RESERVE THESE DATES: SEPTEMBER 4, 5, 6, 1981 (Friday, Saturday, Sunday)
Phone: (415) 453-7865, 453-4800, (707) 433-7211

Send a check today! Limited acceptance, so send now to:

1104 Irwin Street
San Rafael, CA 94901

or

639 Johnson Street
Healdsburg, CA 95448

Assisting: Stephen A. Duff Jr., D. C., Laura Duff-Van Pelt, D. C.,
Bryan A. Duff, D. C., Leonard A. Duff, D. C.

Wine country, Russian River resort area, San Francisco Bay area. A lifetime of questions answered. Be confident in what you do and why you do it. A complete methodology. Highest attainable results for your patient's maximum potential neurological expression!
